NATIONAL OILWELL VARCO, INC.
Notes to Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect reported and contingent amounts of assets and liabilities as of the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The accompanying unaudited consolidated financial statements present information in accordance with accounting principles generally accepted in the United States for interim financial information and the instructions to Form 10-Q and applicable rules of Regulation S-X. They do not include all information or footnotes required by accounting principles generally accepted in the United States for complete financial statements and should be read in conjunction with our 2004 Annual Report on Form 10K.

In our opinion, the consolidated financial statements include all adjustments, all of which are of a normal, recurring nature (except for transaction costs), necessary for a fair presentation of the results for the interim periods. The results of operations for the three months and six months ended June 30, 2005 are not necessarily indicative of the results to be expected for the full year.

2. Varco Merger

Pursuant to our Amended and Restated Agreement and Plan of Merger with Varco International, Inc. ("Varco"), a Delaware corporation, effective as of August 11, 2004 (the "Agreement Date"), we issued 0.8363 shares of National Oilwell common stock for each Varco common share on March 11, 2005 (the "Merger"). We have included the financial results of Varco in our consolidated financial statements beginning March 11, 2005 (the "Merger Date"), the date Varco common shares were exchanged for National Oilwell common shares.

We believe our merger with Varco will better position us to compete more effectively in the global marketplace and provide greater scale to increase service to our customers, increase our investment in research and development to accelerate innovation, and increase stockholder value.

The Merger has been accounted for as a purchase business combination. Assets acquired and liabilities assumed were recorded at their fair values as of March 11, 2005. The total preliminary purchase price is \$2,563.5 million, including the fair value of Varco stock options assumed and estimated acquisition related transaction costs, and is comprised of (in millions):

Shares issued to acquire the outstanding common stock of Varco (84.0 million shares at \$29.99 per share)	\$2,518.4
Fair value of Varco stock options assumed	48.9
Unearned compensation related to stock options assumed	(32.1)
Merger related transaction costs	28.3
Total preliminary purchase price	<u>\$2,563.5</u>

The fair value of shares issued was determined using an average price of \$29.99, which represented the average closing price of our common stock from five trading days before to five trading days after the Agreement Date. The fair value of options assumed was calculated using the Black-Scholes valuation model with the following assumptions as of the Merger Date: expected life from vest date ranging from 0.64 years to 3.6 years, risk-free interest rate of 2.0% — 3.1%, expected volatility of 34% to 47% and no dividend yield. In accordance with our Agreement and Plan of Merger, the number of Varco options exchanged was determined by multiplying the number of Varco options outstanding at closing by 0.8363. Approximately 2.2 million of the 4.0 million Varco options outstanding were fully vested as of the Merger. The portion of the intrinsic value of unvested Varco options related to future service has been allocated to unearned compensation cost and is being amortized using the remaining vesting period of 2.3 years. Compensation expense of \$4.8 million and \$5.9 million related to the vesting of the exchanged options was recognized in the second quarter and first half of 2005, respectively, and is included in transaction costs on the income statement.

Merger related transaction costs include severance and other external costs directly related to the Merger.

Preliminary Purchase Price Allocation

Under the purchase method of accounting, the total preliminary purchase price was allocated to Varco's net tangible and identifiable intangible assets based on their estimated fair values as of March 11, 2005 as set forth below (in millions). The

Table of Contents

excess of the purchase price over the net tangible and identifiable intangible assets was recorded as goodwill. The preliminary allocation of the purchase price was based upon preliminary valuations and our estimates and assumptions are subject to change upon the receipt and management's review of the final valuations. The primary areas of the purchase price allocation which are not yet finalized relate to identifiable intangible assets; property, plant and equipment; and residual goodwill. In addition, upon the finalization of the combined company's legal entity structure, additional adjustments to deferred taxes may be required. The final valuation of net assets is expected to be completed as soon as possible, but no later than one year from the acquisition date in accordance with GAAP.

Cash and marketable securities	\$ 163.5
Trade receivables	385.3
Other current assets	28.5
Inventory	378.1
Property, plant and equipment	688.6
Goodwill	1,484.7
Intangible assets	442.1
Other non-current assets	11.3
Accounts payable and accrued liabilities	(223.9)
Income taxes payable	(13.7)
Debt	(492.8)
Deferred tax liabilities, net	(240.3)
Other non-current liabilities	<u>(47.9)</u>
Total preliminary purchase price	<u>\$2,563.5</u>

Pre-Acquisition Contingencies

We have currently not identified any material pre-merger contingencies where a liability is probable and the amount of the liability can be reasonably estimated. If information becomes available to us prior to the end of the purchase price allocation period, which would indicate that it is probable that such events had occurred prior to the Merger Date and the amounts can be reasonably estimated, such items will be included in the purchase price allocation.

Pro Forma Financial Information

The unaudited financial information in the table below summarizes the combined results of operations of National-Oilwell and Varco, on a pro forma basis, as though the companies had been combined as of the beginning of each of the periods presented. The pro forma financial information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved if the Merger had taken place at the beginning of each of the periods presented. The pro forma financial information for the six months ended June 30, 2005 excludes certain merger-related items such as one-time expense associated with integration expenses and stock-based compensation charges for unvested options assumed, and severance expenses recorded by National-Oilwell in its statements of operations related to change in control provisions that were triggered as part of our Agreement and Plan of Merger in March 2005. The pro forma financial information for all periods presented includes the business combination accounting effect on historical Varco revenues, adjustments to depreciation on acquired property, and amortization charges from acquired intangible assets, and related tax effects.

The unaudited pro forma financial information for the six months ended June 30, 2005 and 2004 combines the historical results for National-Oilwell for the six months ended June 30, 2005 and 2004 and the historical results for Varco for the six months ended June 30, 2005 and 2004 (in millions):

	Six Months Ended June 30,	
	2005	2004
Total revenues	<u>\$2,338.5</u>	<u>\$1,741.1</u>
Net income	<u>\$ 132.8</u>	<u>\$ 73.6</u>
Basic net income per share	<u>\$ 0.77</u>	<u>\$ 0.43</u>
Diluted net income per share	<u>\$ 0.77</u>	<u>\$ 0.43</u>

[Table of Contents](#)

Recent Events

We announced on June 24, 2005 that the merger between National Oilwell and Varco has been challenged by the Norwegian Competition Authority (NCA). The NCA's objection stipulates that the Company must divest certain Norwegian subsidiaries owned by National Oilwell prior to the merger, which conduct business related to the sale and maintenance of drilling equipment. The proposed remedy as we understand it does not affect businesses in Norway owned by Varco prior to the merger, nor does it affect National Oilwell's business not engaged in the provision of the sale and maintenance of drilling equipment. We strongly disagree with the NCA's conclusions, and are actively pursuing an appeal before the Norwegian Ministry of Modernization. We believe that we will be able to resolve matters with the relevant Norwegian government authorities without any material impact on the business or operations of the Company. The merger between National Oilwell and Varco has passed all other anti-trust regulatory agencies around the world, including the Antitrust Division of the U.S Department of Justice.

3. Inventories

Inventories consist of (in millions):

	June 30, 2005	December 31, 2004
Raw materials and supplies	\$ 180.0	\$ 62.6
Work in process	243.4	104.2
Finished goods and purchased products	646.8	490.7
Total	<u>\$1,070.2</u>	<u>\$657.5</u>

Inventories at June 30, 2005 includes amounts from the Varco acquisition — see Note 2 regarding the Varco Merger.

4. Accrued Liabilities

Accrued liabilities consist of (in millions):

	June 30, 2005	December 31, 2004
Accrued compensation	\$ 72.6	\$ 37.0
Customer prepayments	60.9	27.9
Billings in excess of costs	16.6	32.0
Other accrued liabilities	229.4	112.6
Total	<u>\$379.5</u>	<u>\$209.5</u>

Accrued liabilities at June 30, 2005 includes amounts from the Varco acquisition — see Note 2 regarding the Varco Merger.

5. Comprehensive Income

The components of comprehensive income are as follows (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
Net income	\$ 61.2	\$21.4	\$ 96.8	\$32.4
Currency translation adjustments	(27.5)	—	(45.7)	(2.1)
Other	(3.7)	—	(0.6)	(0.5)
Comprehensive income	<u>\$ 30.0</u>	<u>\$21.4</u>	<u>\$ 50.5</u>	<u>\$29.8</u>

6. Business Segments

As a result of the Merger, management has changed its presentation of segment information. Information for prior periods has been restated on a comparable basis. The following describes our new business segments:

[Table of Contents](#)

Rig Technology

Our Rig Technology Group designs, manufactures, sells and services complete rig systems for the drilling, completion, and remediation of oil and gas wells. The Group offers a comprehensive line of highly-engineered machinery which automates complex well construction and management operations, such as offshore and onshore drilling rigs; pipe racking, rotating and assembly systems; coiled tubing equipment and pressure pumping units; well workover rigs; wireline winches; and cranes. Demand for the Group's products is primarily dependent upon capital spending plans by drilling contractors, oilfield service companies, and oil and gas companies, and secondarily on the overall level of oilfield drilling activity, which drives demand for spare parts for the Group's large installed base of equipment. We have made strategic acquisitions during the past several years in an effort to expand our product offering and our global manufacturing capabilities, including new operations in Norway, the United Kingdom and China.

Petroleum Services & Supplies

Our Petroleum Services & Supplies Group provides a variety of consumable goods and services used to drill, complete, remediate and workover oil and gas wells, and manage pipelines, flowlines and other oilfield tubular goods. The Group manufactures, rents and sells a variety of products and equipment used to perform drilling operations, including solids control systems, drilling motors, rig instrumentation systems, and drilling mud pump consumables. Demand for these services and supplies is determined principally by the level of oilfield drilling and workover activity by drilling contractors, major and independent oil and gas companies, and national oil companies. The Group's oilfield tubular services include the provision of inspection and internal coating services and equipment for drillpipe, linepipe, tubing, casing and pipelines, and the design, manufacture and sale of coiled tubing pipe and advanced composite pipe for application in highly corrosive environments. The Group sells its tubular goods and services to oil and gas companies; drilling contractors; pipe distributors; processors and manufacturers; and pipeline operators.

Distribution Services

Our Distribution Services Group provides maintenance, repair and operating supplies and spare parts to drill site and production locations worldwide. In addition to its comprehensive network of field locations supporting land drilling operations throughout North America, the Group supports major offshore drilling contractors through locations in the Middle East, Europe, Southeast Asia and South America. The Group employs advanced information technologies to provide complete procurement, inventory management and logistics services to its customers around the globe. Demand for the Group's services are primarily determined by the level of drilling and remediation activity, and oil and gas production activities.

[Table of Contents](#)

Operating results by segment are as follows (in millions). The 2005 actual results include Varco operations from the acquisition date of March 11, 2005:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004 (Restated)	2005	2004 (Restated)

\$200.0 million Senior Notes, interest at 5.65% payable semiannually, principal due on November 15, 2012	200.0	200.0
\$150.0 million Senior Notes, interest at 5.5% payable semiannually, principal due on November 19, 2012	152.0	—
Other	13.3	—
Total debt	989.7	500.0
Less current portion	154.3	150.0
Long-term debt	\$835.4	\$350.0

[Table of Contents](#)

Senior Notes

Our \$150 million of 6.875% unsecured senior notes were repaid on July 1, 2005 using available cash balances. The Senior Notes contain reporting covenants and the credit facility contains financial covenants regarding maximum debt to capitalization and minimum interest coverage. We were in compliance with all covenants at June 30, 2005.

Revolver Facilities

On June 21, 2005, we amended and restated our existing \$150 million revolving credit facility with a syndicate of lenders to provide the Company a \$500 million unsecured revolving credit facility. This facility will expire in July 2010, and replaces the Company's \$175 million North American revolving credit facility and our Norwegian facility. The Company has the right to increase the facility to \$750 million and to extend the term of the facility for an additional year. At June 30, 2005, there were no borrowings against this facility and there were \$86 million in outstanding letters of credit. Interest under this multicurrency facility is based upon LIBOR, NIBOR or EURIBOR plus 0.30% subject to ratings-based grid, or the prime rate.

Other

Other debt includes approximately \$11 million in promissory notes due to former owners of businesses acquired who remain employed by the Company.

8. Employee Benefit Plans

Total net benefit expense associated with the Company's defined benefit pension and postretirement benefit plans consisted of the following (in millions):

	<u>Three Months Ended June 30,</u>		<u>Six Months Ended June 30,</u>	
	<u>2005</u>	<u>2004</u>	<u>2005</u>	<u>2004</u>
<i>Pension Benefits</i>				
Service cost	\$ 0.9	\$ 0.7	\$ 1.6	\$ 1.5
Interest cost	2.4	1.9	4.5	3.8
Expected return on plan assets	(2.2)	(2.0)	(4.4)	(4.0)
Net amortization and deferral	<u>0.3</u>	<u>0.4</u>	<u>0.7</u>	<u>0.7</u>
Total net benefit expense	<u>\$ 1.4</u>	<u>\$ 1.0</u>	<u>\$ 2.4</u>	<u>\$ 2.0</u>
<i>Postretirement Benefits</i>				
Service cost	\$ 0.1	\$ —	\$ 0.1	\$ —
Interest cost	0.5	0.2	0.6	0.3
Net amortization and deferral	<u>0.1</u>	<u>—</u>	<u>0.2</u>	<u>0.1</u>
Total net benefit expense	<u>\$ 0.7</u>	<u>\$ 0.2</u>	<u>\$ 0.9</u>	<u>\$ 0.4</u>

The acquisition of Varco resulted in the addition of \$42.4 million of pension and post-retirement benefit plan obligations. See Note 2 regarding the Varco Merger.

9. Stock-Based Compensation

We apply Accounting Principles Board (“APB”) Opinion No. 25, “Accounting for Stock Issued to Employees”, and related interpretations in accounting for our stock option plans. Compensation expense is generally not recognized for stock option grants as all options granted have an exercise price equal to the market value of the underlying common stock on the date of grant. However, for the unvested Varco options exchanged in the Merger (see Note 2), we expense the intrinsic value of those options over the remaining vesting period. Compensation expense of \$4.8 million and \$5.9 million related to the vesting of the exchanged options was recognized in the second quarter and first half of 2005, respectively, and is included in transaction costs on the income statement. Had compensation expense for all of our stock option grants been determined on the fair value at the grant dates consistent with the method of Statement of Financial Accounting Standards Board (SFAS) No. 123, “Accounting for Stock-Based Compensation”, our net income and income per share would have been adjusted to the pro forma amounts indicated below (amounts in millions, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
Net income, as reported	\$61.2	\$21.4	\$ 96.8	\$32.4
Add:				
Total stock-based employee compensation expense included in net income, net of related tax effects	3.1	—	3.8	—
Deduct:				
Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(8.5)	(2.1)	(11.8)	(3.6)
Pro forma net income	<u>\$55.8</u>	<u>\$19.3</u>	<u>\$ 88.8</u>	<u>\$28.8</u>
Net income per common share:				
Basic, as reported	<u>\$0.35</u>	<u>\$0.25</u>	<u>\$ 0.70</u>	<u>\$0.38</u>
Basic, pro forma	<u>\$0.32</u>	<u>\$0.23</u>	<u>\$ 0.64</u>	<u>\$0.34</u>
Diluted, as reported	<u>\$0.35</u>	<u>\$0.25</u>	<u>\$ 0.69</u>	<u>\$0.38</u>
Diluted, pro forma	<u>\$0.32</u>	<u>\$0.22</u>	<u>\$ 0.63</u>	<u>\$0.33</u>

For purposes of determining compensation expense using the provisions of SFAS No. 123, the fair value of option grants was determined using the Black-Scholes option-valuation model. The weighted average fair value per share of stock options granted in the first six months of 2005 and 2004 was \$13.19 and \$9.20, respectively. The key input variables used in valuing the options granted in 2005 and 2004 were: risk-free interest rate of 2.7% in 2005 and 2.6% in 2004; dividend yield of zero in each year; stock price volatility of 51% in 2005 and 48% in 2004, and expected option lives of five years for each year presented.

10. Recently Issued Accounting Standards

In March 2005, the Financial Accounting Standards Board (“FASB”) issued Interpretation No. 47, “Accounting for Conditional Asset Retirement Obligations,” (“FIN 47”) which clarifies when an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation. FIN 47 will be effective for fiscal years ending after December 15, 2005, with earlier adoption encouraged. We are currently evaluating the impact this interpretation may have on our financial position, results of operations or cash flows.

In May 2005, the FASB issued Statement of Financial Accounting Standards No. 154, “Accounting Changes and Error Corrections” (“SFAS 154”), which replaces APB Opinion No. 20, “Accounting Changes,” and SFAS No. 3, “Reporting Accounting Changes in Interim Financial Statements.” SFAS 154 requires a voluntary change in accounting principle to be applied retrospectively to all prior period financial statements so that those financial statements are presented as if the current accounting principle had always been applied. SFAS 154 is effective for accounting changes and correction of errors made after January 1, 2006, with early adoption permitted. We do not expect the adoption of SFAS 154 to have a material impact on our financial position, results of operations or cash flows.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Introduction

On March 11, 2005, National-Oilwell, Inc., a Delaware corporation (“National Oilwell”), and Varco International, Inc., a Delaware corporation (“Varco”), jointly announced that the merger of the two companies was approved by stockholders of each company by substantial margins. Pursuant to the Amended and Restated Agreement and Plan of Merger, effective as of August 11, 2004 (the “Merger Agreement”), between National Oilwell and Varco, on closing of the merger, Varco was merged with and into National Oilwell (the “Merger”) and National Oilwell’s name was changed to “National Oilwell Varco, Inc.” In addition, as a result of the merger, each share of Varco common stock outstanding at the effective time was converted into the right to receive 0.8363 shares of NOV common stock. Effective Monday, March 14, 2005, National Oilwell Varco’s common stock began to trade under the symbol NOV on the New York Stock Exchange.

National Oilwell Varco is a worldwide leader in the design, manufacture and sale of equipment and components used in oil and gas drilling and production, the provision of oilfield services, and supply chain integration services to the upstream oil and gas industry.

As a result of the Merger, management has changed its presentation of segment information. Information for prior periods has been made to conform on a comparable basis. The following describes our new business segments:

Rig Technology

Our Rig Technology Group designs, manufactures, sells and services complete rig systems for the drilling, completion, and remediation of oil and gas wells. The Group offers a comprehensive line of highly-engineered machinery which automates complex well construction and management operations, such as offshore and onshore drilling rigs; pipe racking, rotating and assembly systems; coiled tubing equipment and pressure pumping units; well workover rigs; wireline winches; and cranes. Demand for the Group’s products is primarily dependent upon capital spending plans by drilling contractors, oilfield service companies, and oil and gas companies, and secondarily on the overall level of oilfield drilling activity, which drives demand for spare parts for the Group’s large installed base of equipment. We have made strategic acquisitions during the past several years in an effort to expand our product offering and our global manufacturing capabilities, including new operations in Norway, the United Kingdom and China.

Petroleum Services & Supplies

Our Petroleum Services & Supplies Group provides a variety of consumable goods and services used to drill, complete, remediate and workover oil and gas wells, and manage pipelines, flowlines and other oilfield tubular goods. The Group manufactures, rents and sells a variety of products and equipment used to perform drilling operations, including solids control systems, drilling motors, rig instrumentation systems, and drilling mud pump consumables. Demand for these services and supplies is determined principally by the level of oilfield drilling and workover activity by drilling contractors, major and independent oil and gas companies, and national oil companies. The Group’s oilfield tubular services include the provision of inspection and internal coating services and equipment for drillpipe, linepipe, tubing, casing and pipelines, and the design, manufacture and sale of coiled tubing pipe and advanced composite pipe for application in highly corrosive environments. The Group sells its tubular goods and services to oil and gas companies; drilling contractors; pipe distributors, processors and manufacturers; and pipeline operators.

Distribution Services

Our Distribution Services Group provides maintenance, repair and operating supplies and spare parts to drill site and production locations worldwide. In addition to its comprehensive network of field locations supporting land drilling operations throughout North America, the Group supports major offshore drilling contractors through locations in the Middle East, Europe, Southeast Asia and South America. The Group employs advanced information technologies to provide complete procurement, inventory management and logistics services to its customers around the globe. Demand for the Group’s services are primarily determined by the level of drilling and remediation activity, and oil and gas production activities.

Executive Summary

Activity levels in most of our markets were very strong during the second quarter of 2005. Historically high oil and gas prices over the past few years have led to rising levels of exploration and development drilling in many oil and gas basins around the globe. Oil and gas companies, facing declining reserves and the need to grow production to satisfy the rising energy needs of the world, have increased levels of investment in new oil and gas wells. This has led to a level of drilling activity not seen since the early 1980's, which has, in turn, resulted in steadily rising demand for oilfield services over the last several quarters. Much of the new incremental drilling activity is occurring in harsh environments, and employs increasingly sophisticated technology to find and produce reserves.

The rise in demand for drilling rigs has tested the capability of the world's fleet, much of which is old and of limited capability. Drilling contractors have benefited from higher rig dayrates over the past few quarters, and dayrates moved significantly higher during the second quarter of 2005. This has increased cash flows to drilling contractors, who are reinvesting in their fleets of equipment by upgrading and refurbishing older rigs, or by constructing new rigs. Many new offshore jackup rig construction projects were announced through the first half of 2005, and the second quarter saw the announcement of a number of more expensive offshore floating rig new construction projects. There are approximately 37 jackup rigs and 10 floating rigs being constructed worldwide. Additionally, demand for land rigs and components continued to strengthen. This increasing investment in rig capability is benefiting the Company's Rig Technology group, which is a leading supplier of drilling equipment and technology. The Company has the capability to supply up to approximately \$41 million of equipment for a typical jackup rig, up to approximately \$100 million of equipment for a floating rig, and an entire land rig (except for certain components such as engines, which the Company buys in). Placement of orders for drilling equipment for many of these offshore projects, together with continued strong demand for land rigs and components, drove a 40% increase in backlog for the Rig Technology group through the second quarter. Additionally, the group has benefited from the sale of coiled tubing and nitrogen injection equipment used to execute sophisticated new well-stimulation techniques.

The Company's Petroleum Services & Supplies group is benefiting from higher activity levels in the oilfield, which fuels demand for the goods and services it supplies. Sales of composite fiberglass pipe, solids control products and services, drilling motors and jars, mud pump expendables, coiled tubing pipe, rig instrumentation equipment and services, and tubular coating and inspection have all benefited from the higher levels of exploration and production investment in drilling and stimulating wells. The second quarter results for the group were adversely impacted by the seasonal breakup in Canada, when road bans enacted during the spring thaw season limit movement of rigs and thus reduce drilling activity in Canada. The group's operating profit from Canada declined approximately \$10.2 million due to breakup, compared to the pro forma combined results for the group in the first quarter. Group results are expected to improve in Canada in the third quarter, as oilfield activity typically resumes following the second quarter seasonal decline in activity. Second quarter results were also adversely impacted by weak results from the group's pipeline inspection operations, which had low volumes due to delays in several projects, and lower pricing in North America. Excluding Canadian oilfield services and worldwide pipeline inspection operations, the group posted higher revenues, up 13% on a proforma basis, at excellent incremental margins, due to the high level of oilfield activity in most areas and the effect of price increases implemented across many products and services over the last few quarters.

The Company's Distribution Services group has also benefited from higher levels of oilfield activity, which has spurred rising demand for the maintenance, repair and operating supplies it furnishes to the petroleum industry. Many oil companies and drilling contractors are outsourcing their purchasing of routine consumable items to the group, which offers greater purchasing power and sophisticated information management techniques. The group's Canadian revenues declined slightly due to breakup, but the decline was more than offset by gains in the U.S. and in other international locations.

The Rig Technology group results were adversely impacted by developments with a large rig fabrication project for a customer in Kazakhstan, which resulted in a \$21.7 million pre-tax charge, or \$0.08 per share after tax, during the second quarter. Our customer awarded us this \$150 million design and fabrication project last summer, on a very fast one-year timetable. The project includes two large 3000 horsepower land rigs that are coupled with a joint support module designed to hold enough pipe, mud and cement to continue drilling throughout the harsh Caspian winters. The entire structure utilizes a unique skidding system to walk across the ground to move from well to well. The rigs were scheduled to ship in the third quarter of 2005, in order to be able to deliver the rigs to Kazakhstan before cold winter weather prevented their arrival. Due to the short timetable, components for the rigs were fabricated at many of our facilities around the world, and were brought to our Galena Park facility in Houston during the second quarter for final rig up. As components arrived it became evident that additional engineering and assembly would be required in order to integrate the components. As a result of the required modifications the overall weight of the project was increased from approximately 9,000 tons to 11,000 tons, and substantially more rig-up labor was required to complete the rigs. We currently expect to ship the rigs in the third quarter of 2005, very close to our original deadline. We believe our latest cost estimates to complete the project are realistic, but cannot offer absolute assurance that we will not encounter additional setbacks. Excluding the revenue and operating profit impact of this project, Rig Technology revenues were \$563.2 million and operating profit was \$73.6 million, or 13.1% of revenue for the second quarter of 2005.

Table of Contents

The outlook for the Company through the second half of 2005 is good, because, overall activity is expected to remain strong, and because, the Company's backlog for capital equipment sales has risen 52% through the first half of the year. Overall very high levels of drilling across the North America land market and the Middle East, in particular, are expected to continue to drive improved results. Nevertheless, a few important markets have not recovered to the levels of activity seen in prior cyclical peaks, namely the Gulf of Mexico, the North Sea, and Venezuela, but these all appear to be showing modest improvement.

High demand for equipment are expected to result in improved results for our Rig Technology segment in the second half. Over the long run, and excluding swings in mix and other factors, we expect operating leverage, or incremental operating profit divided by incremental revenue, for the Rig Technology group to be in the range of about 22%. Emergence from the seasonal breakup in Canada, and improving pricing for many products and services are expected to result in improved results in the Petroleum Services & Supplies segment. Over the long run, and excluding swings in mix and other factors, we expect operating leverage in the Petroleum Services & Supplies group to be in the range of 30%. The Distribution segment is expected to benefit from the resumption of higher activity levels in Canada, as well as continued high levels of drilling and workover activity elsewhere in the world. Over the long run, and excluding swings in mix and other factors, we expect operating leverage in this group to be approximately 10%.

Upon the completion of the merger with Varco on March 11, 2005 the Company commenced its integration activities to achieve merger synergies. The synergies are expected to result from, among other things, the reduction of redundant overheads between the companies; lower insurance, interest, IT and corporate governance costs; and the combining of manufacturing, sales and engineering functions in product lines where the two organizations overlap. Additionally, we expect to achieve benefits from bringing the manufacture of components in-house, that were previously purchased from third party vendors. Operating profit improvements in the range of \$60 million pre-tax on an annualized run rate basis are expected to flow into the financial results of the Company throughout 2005 and into the first quarter of 2006, higher than earlier estimates. While there can be no guarantee that this level will be achieved, we believe this goal is realistic and continue to develop and execute our plans. We recognized \$15.3MM in transaction and restructuring costs during the second quarter, including severance expenses, inventory rationalization costs, and the amortization of options issued by the company as consideration for the Varco merger.

We announced on June 24, 2005 that the merger between National Oilwell and Varco has been challenged by the Norwegian Competition Authority (NCA). The NCA's objection stipulates that the Company must divest certain Norwegian subsidiaries owned by National Oilwell prior to the merger, which conduct business related to the sale and maintenance of drilling equipment. The proposed remedy as we understand it does not affect businesses in Norway owned by Varco prior to the merger, nor does it affect National Oilwell's business not engaged in the provision of the sale and maintenance of drilling equipment. We strongly disagree with the NCA's conclusions and are actively pursuing an appeal before the Norwegian Ministry of Modernization. We believe that we will be able to resolve matters with the relevant Norwegian government authorities without any material impact on the business or operations of the Company. The merger between National Oilwell and Varco has passed all other anti-trust regulatory agencies around the world, including the Antitrust Division of the U.S Department of Justice.

Operating Environment Overview

The Company's results are dependent on, among other things, the level of worldwide oil and gas drilling, well remediation activity, the prices of crude oil and natural gas, capital spending by other oilfield service companies and drilling contractors, pipeline maintenance activity, and worldwide oil and gas inventory levels. Key industry indicators for the second quarters of 2005 and 2004, and the first quarter of 2005 include the following:

	2Q05*	2Q04*	1Q05*	% 2Q05V 2Q04	% 2Q05V 1Q05
Active Drilling Rigs:					
U.S.	1,336	1,163	1,279	14.9%	4.5%
Canada	241	202	521	19.3%	(53.7%)
International	916	838	876	9.3%	4.6%
Worldwide	2,493	2,203	2,676	13.2%	(6.8%)
Active Workover Rigs:					
U.S.	1,314	1,201	1,261	9.4%	4.2%
Canada	441	420	769	5.0%	(42.7%)
North America	1,755	1,621	2,030	8.3%	(13.5%)
West Texas Intermediate Crude Prices (per barrel)	\$53.09	\$38.36	\$49.88	38.4%	6.4%
Natural Gas Prices (\$/mbtu)	\$ 6.94	\$ 6.10	\$ 6.42	13.8%	8.1%

* Averages for the quarters indicated. See sources below.

The following table details the U.S., Canadian, and international rig activity and West Texas Intermediate Oil prices for the past nine quarters ended June 30, 2005 on a quarterly basis:

Source: Rig count: Baker Hughes, Inc. (www.bakerhughes.com); West Texas Intermediate Crude Price: Department of Energy, Energy Information Administration (www.eia.doe.gov).

[Table of Contents](#)

The worldwide and U.S. quarterly average rig count increased 13.2% (from 2,203 to 2,493) and 14.9% (from 1,163 to 1,336), respectively, in the second quarter of 2005 compared to the second quarter of 2004. The average per barrel price of West Texas Intermediate Crude increased 38.4% (from \$38.36 per barrel to \$53.09 per barrel) while natural gas prices increased 13.8% (from \$6.10 per mmbtu to \$6.94 per mmbtu) in the second quarter of 2005 compared to the second quarter of 2004.

U.S. rig activity at July 29, 2005 was 1,412 rigs compared to the second quarter average of 1,336 rigs. The company believes that current industry projections are forecasting commodity prices to remain strong. However, numerous events could significantly alter these projections including political tensions in the Middle East, the acceleration or deceleration of the recovery of the U.S. and world economies, a build up in world oil inventory levels, or numerous other events or circumstances.

[Table of Contents](#)**Results of Operations**

Operating results by segment are as follows. The actual results include results from Varco operations from the acquisition date of March 11, 2005 (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004 (Restated)	2005	2004 (Restated)
Revenue:				
Rig Technology	\$ 575.2	\$234.9	\$ 999.6	\$ 439.5
Petroleum Services & Supplies	451.5	120.3	660.6	236.0
Distribution Services	258.0	218.4	493.9	436.5
Eliminations	(69.0)	(40.1)	(123.5)	(82.3)
Total Revenue	<u>\$1,215.7</u>	<u>\$533.5</u>	<u>\$2,030.6</u>	<u>\$1,029.7</u>
Operating Profit:				
Rig Technology	\$ 51.9	\$ 17.4	\$ 96.8	\$ 25.0
Petroleum Services & Supplies	76.6	17.4	111.8	33.3
Distribution Services	9.6	6.7	17.2	12.2
Unallocated expenses and eliminations	(20.7)	(3.2)	(31.6)	(6.4)
Transaction costs	(15.3)	—	(26.2)	—
Total Operating Profit	<u>\$ 102.1</u>	<u>\$ 38.3</u>	<u>\$ 168.0</u>	<u>\$ 64.1</u>
Operating Profit %:				
Rig Technology	9.0%	7.4%	9.7%	5.7%
Petroleum Services & Supplies	17.0%	14.5%	16.9%	14.1%
Distribution Services	3.7%	3.1%	3.5%	2.8%
Total Operating Profit %	<u>8.4%</u>	<u>7.2%</u>	<u>8.3%</u>	<u>6.2%</u>

Rig Technology

Three Months Ended June 30, 2005 and 2004. Rig Technology revenue in the second quarter of 2005 was \$575.2 million, an increase of \$340.3 million (145%) compared to the same period of 2004. Second quarter revenue included approximately \$218.3 million of revenue related to the acquisition of Varco. The remainder of the increase can be attributed to the growing market for capital equipment, as evidenced by backlog growth over the past several quarters, as well as increases in spare parts and service revenue. Operating profit from Rig Technology was \$51.9 million for the second quarter ended June 30, 2005, an increase of \$34.5 million (198%) over the same period of 2004. The acquisition of Varco contributed approximately \$48.7 million of the increase in operating profit in the second quarter of 2005. This was offset by the impact of a \$21.7 million charge taken on a large Kazakhstan rig fabrication project in the second quarter. The charge was the result of additional costs primarily due to higher rig-up costs and more material than originally planned.

Six Months Ended June 30, 2005 and 2004. Revenue for the first half of 2005 was \$999.6 million, an increase of \$560.1 million (127%) compared to the same period of 2004. The first half of 2005 revenue includes \$295.9 million of revenue related to the acquisition of Varco, with the remainder of the increase due to the increased business activity as discussed above. Operating profit for the first six months of 2005 was \$96.8 million, an increase of \$71.8 million (287%) compared to 2004. The Varco acquisition accounted for \$67.8 million of the increase. In addition, higher revenue volumes on several large capital equipment orders in the first quarter also contributed to the year to date increase. The increase in operating profit from the higher revenue volume was largely offset by the second quarter charge related to the Kazakhstan rigs discussed above.

Petroleum Services & Supplies

Three Months Ended June 30, 2005 and 2004. Revenue from Petroleum Services & Supplies was \$451.5 million for the second quarter of 2005 compared to \$120.3 million for the second quarter of 2004, an increase of \$331.2 million (275%). The majority of the increase is attributable to the addition of product lines acquired from Varco effective March 11, 2005, which totaled \$278.8 million for the quarter. The remaining increase is attributable to high demand for downhole tools and pumping products,

Table of Contents

which had revenue increases of 42% and 30%, respectively. These increases were the result of strong U.S. and worldwide drilling markets, as reflected by rig count increases of 15% and 13%, respectively, in the second quarter of 2005 compared to the same period 2004. Petroleum Services & Supplies also benefited from price increases implemented during 2004. Revenues increased 35% compared to the second quarter of 2004, excluding Varco revenues.

Operating profit from Petroleum Services & Supplies was \$76.6 million for the second quarter of 2005 compared to \$17.4 million for the second quarter of 2004, an increase of \$59.2 million (340%). The majority of the increase was attributable to the addition of product lines acquired from Varco effective March 11, 2005. Operating profit from these product lines was \$51.7 million for the period. The remaining increase was attributable to higher profitability from downhole tool sales and rentals, and sales of pumping products which had operating profit increases of 113% and 45%, respectively.

Six Months Ended June 30, 2005 and 2004. Revenue from Petroleum Services & Supplies was \$660.6 million for the first six months of 2005 compared to \$236.0 million for the first six months of 2004, an increase of \$424.6 million (180%). The majority of the increase is attributable to the addition of product lines acquired from Varco effective March 11, 2005, which totaled \$339.2 million for the period. The remaining increase is attributable to high demand for downhole tools and pumping products, which had revenue increases of 34% and 31%, respectively. These increases were the result of strong U.S. and worldwide drilling markets, as reflected by rig count increases of 15% and 13%, respectively, in the first six months of 2005 compared to the same period 2004. Petroleum Services & Supplies also benefited from price increases implemented during 2004. Revenues increased 32% compared to the first six months of 2004, excluding Varco revenues.

Operating profit from Petroleum Services & Supplies was \$111.8 million for the first six months of 2005 compared to \$33.3 million for the first six months of 2004, an increase of \$78.5 million (236%). The majority of the increase was attributable to the addition of product lines acquired from Varco effective March 11, 2005. Operating profit from these product lines was \$64.2 million for the period. The remaining increase was attributable to higher profitability from downhole tool sales and rentals, and sales of pumping products which had operating profit increases of 86% and 50%, respectively.

Distribution Services

Three Months Ended June 30, 2005 and 2004. Revenue from Distribution Services was \$258.0 million, an increase of \$39.6 million (18%) during the second quarter of 2005 over the comparable 2004 period as all geographic regions showed improvement. North American revenues were especially strong due to the continued growth in the number of active rigs running in 2005 as well as benefits from additional line pipe projects in Canada. From a product perspective, maintenance, repair and operating supplies, spare parts, and tubular sales all posted increases. Operating income of \$9.6 million in the second quarter of 2005 increased \$2.9 million over the prior year results due to gross margin improvement on higher revenue volumes, partially offset by an increased portion of lower margin project business.

Six Months Ended June 30, 2005 and 2004. Revenue from Distribution Services increased \$57.4 million (13%) in the first half of 2005 when compared to the prior year. Revenue in the international market was up 4%, Canada increased 23% and the U.S Operations increased 12%, all influenced by the year over year improvement in rig count activity. Operating income in the first half of 2005 of \$17.2 million increased by \$5.0 million (41%) from the comparable period in 2004. This increase in operating income was largely achieved by absorbing the revenue increase across an already established distribution infrastructure and expense base.

Unallocated expenses and eliminations

Unallocated expenses and eliminations were \$20.7 million and \$31.6 million for the three and six months ended June 30, 2005 compared to \$3.2 million and \$6.4 million for the same periods of 2004. The increase in operations costs was due to costs associated with Varco operations since the acquisition date, greater inter-segment profit eliminations, and cost increases associated with complying with the Sarbanes-Oxley Act of 2002.

Transaction costs

Transaction costs were \$15.3 million and \$26.2 million for the second quarter and first half of 2005. Transaction costs for the second quarter and first half of 2005 consisted primarily of \$9.0 million of inventory rationalization to be discontinued as a result of the merger, severance costs related to former executive officers and employees of National Oilwell, and the amortization of unvested stock options assumed in the merger.

[Table of Contents](#)

Interest and financial costs

Interest and financial costs were \$14.1 million and \$24.8 million for the second quarter and first half of 2005 compared to \$9.6 and \$18.9 million for the same periods of 2004. The increase was primarily due to interest costs associated with debt assumed in the Varco transaction. See summary of outstanding debt at June 30, 2005 under Liquidity and Capital Resources.

Provision for income taxes

The effective tax rate for the three and six months ended June 30, 2005 was 31.2% and 32.7% respectively (32.0% and 32.3% excluding transaction costs associated with the Varco merger) compared to 28.9% and 29.0% for the same periods in 2004, reflecting a lower percentage of earnings in foreign jurisdictions with lower tax rates and reduced benefits in the US associated with export sales. The US laws granting this tax benefit were repealed as part of the American Jobs Creation Act of 2004 and this benefit will be phased out during the next two years. A new tax benefit associated with US manufacturing operations passed into law under the same Act will be phased in over the next five years. Whereas the timing of the phase out of the export tax benefit and the phase in of the manufacturing tax benefit may differ, we expect the tax reduction associated with the new manufacturing deduction, when fully implemented, to be similar in amount to the export benefit. We anticipate our tax rate for 2005 to be approximately 32% for continuing operations.

Liquidity and Capital Resources

At June 30, 2005, the Company had cash and cash equivalents of \$322.4 million, and total debt of \$989.7 million. At December 31, 2004, cash and cash equivalents were \$142.7 million and total debt was \$500.0 million. The increase in cash holdings and outstanding debt was primarily a result of cash acquired of \$163.5 million and debt assumed of \$492.8 million related to the Varco acquisition. The Company's outstanding debt at June 30, 2005 consisted of \$200.0 million of 5.65% senior notes due 2012, \$200.0 million of 7.25% senior notes due 2011, \$150.0 million of 6.875% senior notes due July 2005, \$150.0 million of 6.5% senior notes due 2011, \$150.0 million of 5.5% senior notes due 2012, \$100.0 million of 7.5% senior notes due 2008, and other debt \$39.7 million. Included in other debt is the fair market value adjustment of the Varco debt assumed in the acquisition which resulted in additional debt recognition of \$33.6 million. The difference will be amortized to interest expense over the remaining life of the debt.

For the first six months of 2005, cash used by operating activities was \$20.7 million compared to cash provided by operating activities of \$18.8 million in the same period of 2004. Cash was used by operations primarily through increases in receivables of \$9.6 million, inventories of \$56.9 million, costs in excess of billings of \$135.9 million, and decreases in billings in excess of costs of \$13.9 million. These negative cash flows were offset by net income of \$96.8 million plus non-cash charges of \$51.3 million and \$13.9 million of tax benefit from the exercise of nonqualified stock options. Receivables and costs in excess of billings increased due to greater revenue and activity in the first six months of 2005 compared to the fourth quarter of 2004, while inventory increased due to growing backlog orders.

For the first six months of 2005, cash provided from investing activities was \$127.8 million compared to \$9.4 million used for the same period of 2004. Cash acquired in the Varco acquisition in the first quarter of 2005 was \$163.5 million.

For the first half of 2005, cash provided by financing activities was \$75.6 million compared to cash used of \$18.0 million in 2004. Cash was provided by proceeds from exercised stock options of \$76.5 million offset by net debt retirements of \$0.9 million.

The Company's \$150 million 6.875% senior notes were repaid on July 1, 2005 using available cash balances. On June 21, 2005, we amended and restated our existing \$150 million revolving credit facility with a syndicate of lenders to provide the Company a \$500 million unsecured revolving credit facility. The facility will expire in July 2010, and replaces the Company's \$175 million North American revolving credit facility and our Norwegian facility. The Company has the right to increase the facility to \$750 million and to extend the term of the facility for an additional year. At June 30, 2005, there were no borrowings against this facility and there were \$86 million in outstanding letters of credit. Interest under this multicurrency facility is based upon LIBOR, NIBOR or EURIBOR plus 0.30% subject to ratings-based grid, or the prime rate.

We believe cash generated from operations and amounts available under the credit facilities and from other sources of debt will be sufficient to fund operations, working capital needs, capital expenditure requirements and financing obligations. We also believe increases in capital expenditures caused by any need to increase manufacturing capacity can be funded from operations or through debt financing.

We intend to pursue additional acquisition candidates, but the timing, size or success of any acquisition effort and the related potential capital commitments cannot be predicted. We expect to fund future cash acquisitions primarily with cash flow from

[Table of Contents](#)

operations and borrowings, including the unborrowed portion of the credit facility or new debt issuances, but may also issue additional equity either directly or in connection with acquisitions. There can be no assurance that additional financing for acquisitions will be available at terms acceptable to us.

Inflation has not had a material impact on our operating results or financial condition in recent years. We believe that the higher costs for energy, steel and other commodities experienced in 2004 have largely been mitigated by increased prices and component surcharges for the products we sell. However, higher steel, energy or other commodity prices may adversely impact future periods.

Critical Accounting Policies and Estimates

In preparing the financial statements, we make assumptions, estimates and judgments that affect the amounts reported. We periodically evaluate our estimates and judgments related to allowance for doubtful accounts; inventory reserves; warranty accruals; impairments of long-lived assets (including goodwill); income taxes and pensions and other postretirement benefits. Our estimates are based on historical experience and on our future expectations that we believe are reasonable; the combination of these factors forms the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results are likely to differ from our current estimates and those differences may be material.

Revenue Recognition

The Company's products and services are sold based upon purchase orders or contracts with the customer that include fixed or determinable prices and that do not include right of return or other similar provisions or other significant post delivery obligations. Except for certain construction contracts described below, the Company records revenue at the time its manufacturing process is complete, the customer has been provided with all proper inspection and other required documentation, title and risk of loss has passed to the customer, collectibility is reasonably assured and the product has been delivered. Customer advances or deposits are deferred and recognized as revenue when the Company has completed all of its performance obligations related to the sale. The Company also recognizes revenue as services are performed. The amounts billed for shipping and handling cost are included in revenue and related costs are included in costs of sales.

Revenue Recognition under Long-term Construction Contracts

The Company recognizes revenue on certain long-term construction contracts using the percentage-of-completion method, an output based measure focused on engineering estimates and manufacturing progress. For certain projects where output measures are not clearly identified, the Company uses the cost-to-cost method. This method requires us to make estimates regarding the total costs of the project, our progress against the project schedule and the estimated completion date, all of which impact the amount of revenue and gross margin we recognize in each reporting period. Changes in job performance, job conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements may result in revisions to costs and income and are recognized in the period in which the revisions are determined. Profit incentives are included in revenues when their realization is reasonably assured. Provisions for anticipated losses on uncompleted contracts are recorded in full when such losses become evident.

Allowance for Doubtful Accounts

Allowance for doubtful accounts are determined on a specific identification basis when we believe that the required payment of specific amounts owed to us is not probable. A substantial portion of the Company's revenues come from international oil companies, international oilfield service companies, and government-owned or government-controlled oil companies. Therefore, the Company has significant receivables in many foreign jurisdictions. If worldwide oil and gas drilling activity or changes in economic conditions in foreign jurisdictions deteriorate, our customers may be unable to repay these receivables, and additional allowances could be required.

Inventory Reserves

Reserves for inventory are determined based on our historical usage of inventory on-hand as well as our future expectations related to requirements to provide spare parts for our substantial installed base and new products. Changes in worldwide oil and gas drilling activity and the development of new technologies associated with the drilling industry could require the Company to record additional allowances to reduce the value of inventory to the lower of its cost or net realizable value.

[Table of Contents](#)

Warranty Accruals

Accruals for warranty claims are provided based on historical experience at the time of sale. Most product warranties cover periods from one to three years. Our accruals for warranty claims are affected by the size of our installed base of products currently under warranty, as well as new products delivered to the market. If actual experience proves different from historical estimates, changes to the Company's provision rates may be required.

Impairment of Long-Lived Assets (Including Goodwill)

Long-lived assets, which include property and equipment, goodwill, and identified intangible assets, comprise a significant amount of the Company's total assets. The Company makes judgments and estimates in conjunction with the carrying value of these assets, including amounts to be capitalized, depreciation and amortization methods and useful lives. Additionally, the carrying values of these assets are reviewed for impairment periodically or whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. An impairment loss is recorded in the period in which it is determined that the carrying amount is not recoverable. This requires the Company to make long-term forecasts of its future revenues and costs related to the assets subject to review. These forecasts require assumptions about demand for the Company's products and services, future market conditions and technological developments. Significant and unanticipated changes to these assumptions or the intended use of these assets could require a provision for impairment in a future period.

In accordance with SFAS 142, the Company performs a review of goodwill for impairment annually or earlier if indicators of potential impairment exist. The annual impairment tests are performed during the fourth quarter of each year. If it is determined that goodwill is impaired, that impairment is measured based on the amount by which the book value of goodwill exceeds its implied fair value. The implied fair value of goodwill is determined by deducting the fair value of a reporting unit's identifiable assets and liabilities from the fair value of that reporting unit as a whole. Additional impairment assessments may be performed on an interim basis if the Company encounters events or changes in circumstances that would indicate that, more likely than not, the carrying amount of goodwill has been impaired. Fair value of the reporting units is determined based on internal management estimates, using a combination of three methods: discounted cash flow, comparable companies, and representative transactions.

Income Taxes

In accordance with the provisions of SFAS No. 109, Accounting for Income Taxes, we account for income taxes using the asset and liability method. In determining income (loss) for financial statement purposes, we must make certain estimates and judgments. These estimates and judgments affect the calculation of certain tax liabilities and the determination of the recoverability of certain of the deferred tax assets, which arise from temporary differences between the tax and financial statement recognition of revenue and expense. Deferred tax assets are also reduced by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the recorded deferred tax assets will not be realized in future periods. In evaluating our ability to recover our deferred tax assets we consider all available positive and negative evidence including our past operating results, the existence of cumulative losses in the most recent years and our forecast of future taxable income. In estimating future taxable income, we develop assumptions including the amount of future state, federal and international pretax operating income, reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates we are using to manage the underlying businesses.

We currently have recorded significant valuation allowances that we intend to maintain until it is more likely than not the deferred tax assets will be realized. Other than valuation allowances associated with tax attributes acquired through acquisitions, our income tax expense recorded in the future will be reduced to the extent of decreases in our valuation allowances. The realization of our remaining deferred tax assets is primarily dependent on future taxable income. Any reduction in future taxable income including but not limited to any future restructuring activities may require that we record an additional valuation allowance against our deferred tax assets. An increase in the valuation allowance would result in additional income tax expense in such period and could have a significant impact on our future earnings. If a change in a valuation allowance occurs, which was established in connection with an acquisition, such adjustment may impact goodwill rather than the income tax provision. In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations in a multitude of jurisdictions across our global operations. We recognize potential liabilities and record tax reserves for anticipated tax audit issues in the U.S. and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. These tax liabilities are reflected net of related tax loss carry forwards. We adjust these reserves in light of changing facts and circumstances; however, due to the complexity of some of these uncertainties, the ultimate resolution may result in a payment that is materially different from our current estimate of the tax liabilities. If our estimate of tax liabilities proves to be less than the ultimate assessment, an additional charge to expense would result. If payment of these amounts ultimately proves to be less than the recorded amounts, the reversal of the liabilities would result in tax benefits being

[Table of Contents](#)

recognized in the period when we determine the reserves are no longer necessary. If the tax liabilities relate to tax uncertainties existing at the date of the acquisition of a business, the adjustment of such tax liabilities will result in an adjustment to the goodwill recorded at the date of acquisition.

Pensions and Other Postretirement Benefits

The Company accounts for our defined benefit pension plans in accordance with Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions (FAS 87), which requires that amounts recognized in the financial statements be determined on an actuarial basis. Significant elements in determining our pension income or expense in accordance with FAS 87 are the discount rate assumption and the expected return on plan assets. The discount rate used approximates the weighted average rate of return on high-quality fixed income investments whose maturities match the expected payouts. The expected return on plan assets is based upon the geometric mean of historical returns of a number of different equities, including stocks, bonds and U.S. treasury bills. The assumed long-term rate of return on assets is applied to a calculated value of plan assets which results in an estimated return on plan assets that is included in current year pension income or expense. The difference between this expected return and the actual return on plan assets is deferred and amortized against future pension income or expense.

Recently Issued Accounting Standards

In March 2005, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 47, "Accounting for Conditional Asset Retirement Obligations," ("FIN 47") which clarifies when an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation. FIN 47 will be effective for fiscal years ending after December 15, 2005, with earlier adoption encouraged. We are currently evaluating the impact this interpretation may have on our financial position, results of operations or cash flows.

In May 2005, the FASB issued Statement of Financial Accounting Standards No. 154, "Accounting Changes and Error Corrections" ("SFAS 154"), which replaces APB Opinion No. 20, "Accounting Changes," and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements." SFAS 154 requires a voluntary change in accounting principle to be applied retrospectively to all prior period financial statements so that those financial statements are presented as if the current accounting principle had always been applied. SFAS 154 is effective for accounting changes and correction of errors made after January 1, 2006, with early adoption permitted. We do not expect the adoption of SFAS 154 to have a material impact on our financial position, results of operations or cash flows.

Forward-Looking Statements

Some of the information in this document contains, or has incorporated by reference, forward-looking statements. Statements that are not historical facts, including statements about our beliefs and expectations, are forward-looking statements. Forward-looking statements typically are identified by use of terms such as "may," "will," "expect," "anticipate," "estimate," and similar words, although some forward-looking statements are expressed differently. All statements herein regarding expected Merger synergies or the expected completion of the Kazakhstan rig fabrication project are forward-looking statements. You should be aware that our actual results could differ materially from results anticipated in the forward-looking statements due to a number of factors, including but not limited to changes in oil and gas prices, customer demand for our products, difficulties encountered in integrating mergers and acquisitions, and worldwide economic activity. You should also consider carefully the statements under "Risk Factors," as disclosed in our Form 10-K for the year ending December 31, 2004, which address additional factors that could cause our actual results to differ from those set forth in the forward-looking statements. Given these uncertainties, current or prospective investors are cautioned not to place undue reliance on any such forward-looking statements. We undertake no obligation to update any such factors or forward-looking statements to reflect future events or developments.

Supplemental Pro Forma Comparison

The pro forma information reflects results as if the Varco acquisition occurred at the beginning of the first quarter of 2005 and 2004. The results include the estimated effect of purchase accounting adjustments, but do not include any effect from cost savings that may result from the merger and do not include restructuring charges, amortization of unvested compensation expense associated with options issued as part of the Merger, litigation gains and transaction-related costs in prior periods. The unaudited pro forma financial statements are presented for informational purposes only and are not necessarily indicative of actual results of operations or financial position that would have occurred had the transaction been consummated at the beginning of the period presented, nor are they necessarily indicative of future results.

[Table of Contents](#)

Pro forma combined operating results by segment are as follows (in millions):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
Revenue:				
Rig Technology	\$ 575.2	\$382.2	\$1,118.5	\$ 725.4
Petroleum Services & Supplies	451.5	342.0	853.5	661.5
Distribution Services	258.0	218.4	493.9	436.5
Eliminations	(69.0)	(40.1)	(127.4)	(82.3)
Total Revenue	<u>\$1,215.7</u>	<u>\$902.5</u>	<u>\$2,338.5</u>	<u>\$1,741.1</u>
Operating Profit:				
Rig Technology	\$ 51.9	36.2	\$ 113.2	\$ 54.3
Petroleum Services & Supplies	76.6	47.9	140.2	93.8
Distribution Services	9.6	6.7	17.2	12.2
Unallocated expenses and eliminations	(20.7)	(12.7)	(42.7)	(24.2)
Total Operating Profit	<u>\$ 117.4</u>	<u>\$ 78.1</u>	<u>\$ 227.9</u>	<u>\$ 136.1</u>
Operating Profit %:				
Rig Technology	9.0%	9.5%	10.1%	7.5%
Petroleum Services & Supplies	17.0%	14.0%	16.4%	14.2%
Distribution Services	3.7%	3.1%	3.5%	2.8%
Total Operating Profit %	<u>9.7%</u>	<u>8.7%</u>	<u>9.7%</u>	<u>7.8%</u>

Rig Technology

Three and Six Months Ended June 30, 2005 and 2004. Rig Technology revenue on a pro forma basis in the second quarter and first half of 2005 was \$575.2 million and \$1,118.5 million, an increase of \$193.0 million or 50% and \$393.1 million or 54% compared to the same periods of 2004, principally due to the growing capital equipment market for drilling, workover and coiled tubing products discussed above. Rig Technology operating profit was \$51.9 million and \$113.2 million for the second quarter and first half of 2005, increases of \$15.7 million and \$58.9 million over the same periods of 2004 on a pro forma basis. The increase was due to higher sales volumes and reduced costs on capital equipment orders as compared to the second quarter and first six months of 2004, as well as overhead cost reductions, offset by the \$21.7 million charge on the Kazakhstan rig fabrication project in the second quarter of 2005. Backlog of the Rig Technology capital products was \$1,191 million at June 30, 2005, an increase of 339.4 million (40%) over backlog of \$851.6 million at March 31, 2005, and an increase of 52% over pro forma combined backlog of \$782.9 million at December 31, 2004. New orders for the second quarter were \$735.5 million, reflective of the growing demand for the Company's drilling and well servicing products.

Petroleum Services & Supplies

Three Months Ended June 30, 2005 and 2004. Revenue on a pro forma basis from Petroleum Services & Supplies was \$451.5 million for the second quarter of 2005 compared to \$342.0 million for second quarter of 2004, an increase of \$109.5 million (32%). The increase is attributable to a significant increase in U.S. and worldwide drilling activity, price increases implemented during 2004, strong spare part and consumable sales to support increased drilling and acquisitions made in 2004. The revenue increase attributable to acquisitions is approximately \$4.4 million. Operating profit on a pro forma basis for Petroleum Services & Supplies was \$76.6 million for the second quarter of 2005 compared to \$47.9 for the second quarter of 2004, an increase of \$28.7 million (60%). Improved quarter-over-quarter results were posted across all product lines with the exception of pipeline inspection.

Six Months Ended June 30, 2005 and 2004. Revenue on a pro forma basis from Petroleum Services & Supplies was \$853.5 million for the first six months of 2005 compared to \$661.5 million for first six months of 2004, an increase of \$192.0 million (29%). The increase is attributable to a significant increase in U.S. and worldwide drilling activity, price increases implemented during 2004, strong spare parts and consumable sales to support increased drilling and acquisitions made in 2004. The revenue

[Table of Contents](#)

increase attributable to acquisitions is approximately \$11.8 million. Operating profit on a pro forma basis for Petroleum Services & Supplies was \$140.2 million for the first six months of 2005 compared to \$93.8 million for the first six months of 2004, an increase of \$46.4 million (49%). Improved year-over-year results were posted across most product lines with the exception of pipeline inspection and fiberglass pipe sales which experienced lower margins due to significantly higher raw material costs.

Distribution Services

Results for Distribution Services on a pro forma basis are the same as they are for actual. See discussion above regarding Distribution Services.

Unallocated expenses and eliminations

Unallocated expenses and eliminations on a pro forma basis were \$20.7 million and \$42.7 million for the three and six months ended June 30, 2005, increases of \$8.0 million and \$18.5 million compared to the three and six months ended June 30, 2004. The increase in unallocated operating costs was due to greater inter-segment profit eliminations, cost increases associated with complying with Sarbanes-Oxley legislation, and greater legal costs.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to changes in foreign currency exchange rates and interest rates. Additional information concerning each of these matters follows:

Foreign Currency Exchange Rates

We have operations in foreign countries, including Canada, Norway and the United Kingdom, as well as operations in Latin America, China and other European countries. The net assets and liabilities of these operations are exposed to changes in foreign currency exchange rates, although such fluctuations generally do not affect income since their functional currency is the local currency. These operations also have net assets and liabilities not denominated in the functional currency, which exposes us to changes in foreign currency exchange rates that do impact income. We recorded foreign exchange gains in our income statement of approximately \$3.1 million in the first six months of 2005, compared to \$1.0 million in foreign exchange gains in the same period of the prior year. We do not believe that a hypothetical 10% movement in these foreign currencies would have a material impact on our earnings.

Some of our revenues in foreign countries are denominated in U.S. dollars, and therefore, changes in foreign currency exchange rates impact our earnings to the extent that costs associated with those U.S. dollar revenues are denominated in the local currency. In order to mitigate that risk, we may utilize foreign currency forward contracts to better match the currency of our revenues and associated costs. We do not use foreign currency forward contracts for trading or speculative purposes.

At June 30, 2005, we had also entered into several foreign currency forward contracts with notional amounts aggregating \$301.9 million to hedge exposure to currency fluctuations in various foreign currencies, including the British Pound Sterling, the Euro, Norwegian Kroner and the Singapore Dollar. These exposures arise when local currency operating expenses are not in balance with local currency revenue collections. These foreign currency forward contracts are designated as cash flow hedging instruments and are fully effective. Based on quoted market prices as of June 30, 2005 for contracts with similar terms and maturity dates, we have recorded a loss for the first six months of \$2.8 million, net of tax of \$0.9 million, to adjust these foreign currency forward contracts to their fair market value. This loss is included in other comprehensive income in the consolidated condensed balance sheet. We do not believe that a hypothetical 10% movement in these foreign currencies would have a material impact on our earnings.

The company also had several foreign currency forward contracts with notional amounts aggregating \$33.7 million designated and qualifying as fair value hedges to hedge exposure to the Euro. Based on quoted market prices as of June 30, 2005 for contracts with similar terms and maturity dates, we recorded a gain of \$0.4 million to adjust these foreign currency forward contracts to their fair market value. This gain offsets designated losses on firm commitments. We do not believe that a hypothetical 10% movement in these foreign currencies would have a material impact on our earnings.

The Company has other financial market risk sensitive instruments denominated in foreign currencies totaling \$5.4 million as of June 30, 2005 excluding trade receivables and payables, which approximate fair value. These market risk sensitive instruments consisted of cash balances and overdraft facilities. The Company estimates that a hypothetical 10% movement of all applicable foreign currency exchange rates on these financial market risk sensitive instruments would affect net income by \$0.4 million.

[Table of Contents](#)

The counterparties to forward contracts are major financial institutions. The credit ratings and concentration of risk of these financial institutions are monitored on a continuing basis. In the unlikely event that the counterparties fail to meet the terms of a foreign currency contract, our exposure is limited to the foreign currency rate differential.

Interest Rate Risk

At June 30, 2005 our long term borrowings consisted of \$150 million in 6.875% senior notes, (which matured and were repaid on July 1, 2005), \$100 million in 7.5% senior notes, \$150 million in 6.5% senior notes, \$200 million in 7.25% senior notes, \$200 million in 5.65% senior notes and \$150 million in 5.5% senior notes. We had no borrowings under our other credit facilities at June 30, 2005. We occasionally have borrowings under our other credit facilities, and a portion of these borrowings could be denominated in multiple currencies which could expose us to market risk with exchange rate movements. These instruments carry interest at a pre-agreed upon percentage point spread from either LIBOR, NIBOR or EURIBOR, or at the prime interest rate. Under our credit facilities, we may, at our option, fix the interest rate for certain borrowings based on a spread over LIBOR, NIBOR or EURIBOR for 30 days to 6 months. Our objective is to maintain a portion of our debt in variable rate borrowings for the flexibility obtained regarding early repayment without penalties and lower overall cost as compared with fixed-rate borrowings.

As of June 30, 2005, we had three interest rate swap agreements with an aggregate notional amount of \$100 million associated with our 2008 senior notes. Under this agreement, we receive interest at a fixed rate of 7.5% and pay interest at a floating rate of six-month LIBOR plus a weighted average spread of approximately 4.675%. The swap agreements will settle semi-annually and will terminate in February 2008. The swap agreements originally entered into by Varco were recorded at their fair market value at the date of the Merger and no longer qualify as effective hedges under FAS 133. The swaps will be marked-to-market for periods subsequent to the Merger and any change in their value will be reported as an adjustment to interest expense. The change in the fair market value of the interest swap agreements resulted in a \$1.7 million reduction in interest expense for the quarter ended June 30, 2005.

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Company's President and Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this report to timely alert them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic Securities and Exchange Commission filings.

We are required to disclose certain changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during our most recent fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting. There are none. However, in the process of documenting and testing our internal control in connection with compliance with Rule 13a-15(c) under the Exchange Act of 1934, as amended (required by Section 404 of the Sarbanes-Oxley Act of 2002) we have made changes, and will continue to make changes, to refine and improve our internal control. Additionally, the Company appointed a new Chief Financial Officer and a new Corporate Controller following its merger with Varco during the first quarter.

Accounting Officer)

INDEX TO EXHIBITS**(a) Exhibits**

Exhibit No.	Description	Note No.
4.1	Indenture, dated as of February 25, 1998, between Varco, the Guarantors named therein and The Bank of New York as trustee, relating to \$100,000,000 aggregate principal amount of 7.5% Senior Notes due 2008; Specimen Certificate of 7.5% Senior Notes due 2008 (private notes); and Specimen Certificate at 7.5% Senior Notes due 2008 (public notes).	(Note 2)
4.1.1	Fifth Supplemental Indenture dated September 30, 2004 to Indenture dated February 25, 1998 by and among Varco, the Guarantors named therein and the Bank of New York Trust Company, N.A. as trustee.	(Note 18)
4.2	Indenture, dated as of May 1, 2001, among Varco, the Guarantors named therein and The Bank of New York as trustee, relating to \$200,000,000 aggregate principal amount of 7.25% Senior Notes due 2011; Specimen Certificate of 7.25% Senior Notes due 2011 (private notes); and Specimen Certificate of 7.25% Senior Notes due 2011 (public notes).	(Note 3)
4.2.1	Third Supplemental Indenture dated September 30, 2004 to Indenture dated May 1, 2001 by and among Varco, the Guarantors named therein and the Bank of New York Trust Company, N.A. as trustee.	(Note 18)
4.3	Indenture, dated as of November 19, 2002, between Varco, the guarantors named therein and The Bank of New York Trust Company of Florida as trustee, relating to \$150,000,000 aggregate principal amount of 5.5% Senior Notes due 2012 (private notes) Specimen Certificate of 5.5% Senior Notes due 2012 (private notes); and Specimen Certificate of 5.5% Senior Notes due 2012 (public notes).	(Note 4)
4.3.1	First Supplemental Indenture dated September 30, 2004 to Indenture dated November 19, 2002 by and among Varco, the Guarantors named therein and the Bank of New York Trust Company, N.A. as trustee.	(Note 18)
4.4	Registration Rights Agreement dated as of November 19, 2002, among Varco and Salomon Smith Barney Inc.	(Note 4)
10.1.1*	Form of Stock Option Agreement (Exhibit 10.1)	(Note 1)
10.2	Amended and Restated Credit Agreement, dated as of June 21, 2005, among National Oilwell Varco, Inc., the financial institutions signatory thereto, including Wells Fargo Bank, National Association, in their capacities as lenders thereunder, as US administrative agent for the lenders, as Lead Arranger and Sole Book Runner, DnB NOR Bank ASA, as Norwegian Administrative Agent, DnB NOR Bank ASA and the Bank of Nova Scotia as Co-Documentation Agents, and Comerica Bank and JPMorgan Case Bank, N.A. as Co-Syndication Agents.	(Note 17)
10.3*	Varco International, Inc. Deferred Compensation Plan (effective January 1, 2003)	(Note 14)
10.4*	2003 Equity Participation Plan of Varco International, Inc.	(Note 15)
10.4.1*	Form of Non-qualified Stock Option Agreement for Employees and Consultants; Form of Non-qualified Stock Option Agreement for Independent Directors.	(Note 13)
10.4.2*	Form of Signature Page for Executive Officer Stock Option Agreement	(Note 16)
10.5*	Amended and Restated Stock Option Plan for Key Employees of Tuboscope Vetco International Corporation; Form of Revised Incentive Stock Option Agreement; and Form of Revised Non-Qualified Stock Option Agreement.	(Note 5)

Table of Contents

Exhibit No.	Description	Note No.
10.6*	Stock Option Plan for Non-Employee Directors; Amendment to Stock Option Plan for Non-Employee Directors; and Form of Stock Option Agreement.	(Note 6)
10.7*	Amendment and Restatement of the Varco International, Inc. Supplemental Executive Retirement Plan (effective as of November 15, 2001)	(Note 14)

Exhibit 31.1
CERTIFICATION

I, Merrill A. Miller, Jr., certify that:

1. I have reviewed this quarterly report on Form 10-Q of National Oilwell Varco, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
